Reasons for Allowance

The Patent Office provides at least a reason for the Allowance of this Application to wit: that the prior art neither singly or in a reasonable combination teaches or reasonably suggests the combination of steps which comprise a providing a shell made of a first material, wherein said shell includes a passage, providing a potting compound which is initially in a liquid state but which will harden into a solid state placing the length of strands within the passage in the shell, putting a potting compound in the liquid state along the length of the strands, allowing the potting compound to harden thereby bonding the strands to the shell, placing the strands and the shell into a mold and molding an anchor made of a second material having properties different from the first material around the length of strands and the shell to form a completed termination
